PEPTIDES

VOLUME 4 1983

SUBJECT INDEX

Absorption time, 5
  α-MSH metabolism
  route of administration
Acetylcholine release, 49
  caerulein
  guanidine
  guinea pig
  myenteric plexus
  somatostatin
ACTH
  age differences, 469
  blood pressure, 221
  cortisol, 221, 785
  41-CRF antiserum, 301
  depression, 785, 789
  β-endorphin, 301, 469, 789
  epilepsy, 315
  human studies, 469, 789
  hypothalamic-pituitary-adrenal regulation, 785
  β-lipotropin, 469
  α-MSH, 301
  muscarinic receptors, 789
  ovine CRF, 221
  rabbits, 315
  sheep, 221
ACTH 1–17, 183
  circadian rhythm
  cornea
  mitotic index
  placebo
ACTH $_{1-39}$, 117
  biphasic effects
  locomotor activity
  naltrexone
ACTH analogues, 11
  drug discrimination
  MSH/ACTH$_{4-10}$
  ORG 2766
Adenylate cyclase, 89
  adrenal cortex
  cyclo (His-Pro) specific binding
  histidyl-proline diketopiperazine
  monoamine oxidase
  thyrotropin releasing hormone
Adrenal cortex, 89
  adenylate cyclase
  cyclo (His-Pro) specific binding
  histidyl-proline diketopiperazine
  monoamine oxidase
  thyrotropin releasing hormone
Adrenal glands, 121
  enkephalin-containing polypeptide
  hypertension, spontaneous
Adrenal medulla, 807
  corticotropin releasing factor (CRF)
  eating
  vagus nerve
Adrenalectomy
  bombesin, 907
  brain mRNA, 651
  glucocorticoid, 651
  grooming, 907
  hypophysectomy, 907
  opioid peptides. 651
  solution hybridization, 651
Affective disorders, 775
  hypothalamic-pituitary-adrenal axis
  neurotransmitters
Age differences
  ACTH, 469
  β-endorphin, 469
  human studies, 469
  hypothalamo neurohypophyseal system, 165
  β-lipotropin, 469
  neurosecretory activity, 165
  oxytocin, 165
  thiamine pyrophosphatase, 165
  vasopressin, 165
Aggression, 763
  antinociception
  C-terminal fragments
  N-terminal fragments
  substance
Aging, 865
  d-amphetamine
  circadian rhythms
  motor activity
  α-MSH
  thermoregulation
Alcohol, 563
  cardiovascular responses
  dependence
  depression
  drinking
  eating
  endogenous opiates
  epilepsy
  learning
  memory
  schizophrenia
  shock
  social behavior
  stress
  tolerance
Alligators, 311
  anorexia
  TRH
Amino acid analysis, 853
  bioassay
  rat prostate
  receptor assay
  thyrotropin-releasing hormone
Aminoenkephalinase, 639
  peptidase
Amnesia, 293
  electroconvulsive shock
  passive avoidance
  somatostatin
cAMP, 261
  neuromodulation
  norepinephrine
  vasopressin
Amphetamine, 749
  cholecystokinin
  locomotor activity
  open field
d-Amphetamine, 865
  aging
  circadian rhythms
  motor activity
  α-MSH
  thermoregulation
Amphibians
  arginine vasotocin, 97
  caerulein, 457
  CCK, 457
  5 α-dihydrotestosterone, 97
  17β-estradiol, 97
  sexual behavior, male newts, 97
  vasopressin antagonists, 97
Amygdala, 657
  double labeling
  somatostatin
Analeptics, 255
  anesthesia
  barbiturates
  radioligand binding assay
  thyrotropin releasing hormone
Analgesia
  dermorphin, 577
  electro-acupuncture, 501
  horses, 501
  intestinal motility, 577
Anesthesia, 255
  analeptics
  barbiturates
  radioligand binding assay
  thyrotropin releasing hormone
Angiotensin II
  central sympathetic outflow, 59
  cholecystokinin octapeptide, 103
  drinking, 103, 159
  eating, 103
  endogenous opioid neurons, 59
  β-endorphin, 59
  hamsters, 103

oxytocin, 137
plasma catecholamines, 59
route of administration, 159
saralasin, 59
steric parameter, 137
structure activity relationship, 137
vagotomy, abdominal, 159
Animal models, 631
endogenous opioids
spinal cord injury
Anorexia, 311
alligators
TRH
Anorexia nervosa, 85
anorexigenic peptide
body weight
drinking
eating
growth
hyperthermia
metabolism
thermoregulation
Anorexigenic peptide, 85
anorexia nervosa
body weight
drinking
eating
growth
hyperthermia
metabolism
thermoregulation
Antibodies, 343
antigenic sites
apolipoprotein A-II
synthetic peptides
Antigenic sites, 343
antibodies
apolipoprotein A-II
synthetic peptides
Antinociception
aggression, 763
C-terminal fragments, 763
dose response, 31
naloxone, 31
N-terminal fragments, 763
substance P, 31, 763
Antipyresis, 199
fever
α-MSH
rabbits
septal region
thermoregulation
Antivasopressin serum, 265
memory
passive avoidance
retention
vasopressin
Antral mucosa, 319
gastrin hexapeptide
gastrin tetrapeptide
isolation
Apamin, 133
cerebral cortex
liver, hog
neuropeptides
uterine smooth muscle, hog
vasoactive intestinal polypeptide binding sites
Apolipoprotein A-II, 343
antibodies
antigenic sites
synthetic peptides
Apparatus, 165
Golgi apparatus
Arginine vasopressin
biorhythm, 875
circadian rhythm, 875
gerbil, 801
paraventricular nucleus, 875
seizures, 801
suprachiasmatic nucleus, 875
supraoptic nucleus, 875
thermoregulation, 801
Arginine vasotocin, 97
amphibians
5 α-dihydrotestosterone
17β-estradiol
sexual behavior, male newts
vasopressin antagonists
Autonomic nervous system, 617
cardiovascular responses
catecholamines
thyrotropin-releasing hormone (TRH)
Autonomic responses, 37
bradycardia, conditioned
conditioning, Pavlovian
heart rate
learning
nictitating membrane
rabbits
vasopressin analogs
Avoidance
cholecystokinin octapeptide
tolerance
^{3}H-AVP, 335
brain receptors
neuropeptide

Baboons, 687
bombesin
eating
plasma glucose
plasma insulin
satiety
Bar press, 145
learning
memory
α-MSH
visual processes
Y maze
Barbiturates, 255
analeptics
anesthesia
radioligand binding assay
thyrotropin releasing hormone
Binding assay, 755
cholecystokinin (CCK)
[^{3}H]Pentagastrin
Bioassay, 853
amino acid analysis
rat prostate
receptor assay
thyrotropin-releasing hormone
Biochemical characterization, 463
peptide localization
Biosynthesis, 963
immunocytochemistry
LHRH
Biorhythm, 875
arginine-vasopressin
circadian rhythm
paraventricular nucleus
suprachiasmatic nucleus
supraoptic nucleus
Biotinylated GnRH, 549
cytochemical characterization
Biphasic effects, 117
$ACTH_{1-39}$
locomotor activity
naltrexone
Blood pressure
ACTH, 221
cortisol, 221
CRF, 211, 217
endocrine system, 211, 217
heart rate, 627
neurohypophyseal peptides, 627
ovine CRF, 221
rhesus monkeys, 211, 217
sheep, 221
Body temperature, 325
bombesin
brain monoamines
γ-MSH
somatostatin-28
TRH
Body weight, 85
anorexia nervosa
anorexigenic peptide
drinking
eating
growth
hyperthermia
metabolism
thermoregulation
Bombesin
adrenalectomy, 907
baboons, 687
bodytemperature, 325
brain monoamines, 325
cancer, 683
cats, 673
cholecystokinin, 405
cholecystokinin octapeptide, 1
eating, 1, 405, 687
exploratory behavior, 405
grooming, 907
human studies, 683
hypophysectomy, 907
lithium, 405
locomotor activity, 693
γ-MSH, 325
neuroendocrine peptides, 683
neuroleptics, 693
operant behavior, 1
oropharyngeal stimulus, 1
plasma glucose, 687
plasma insulin, 687
satiety, 1, 687
somatostatin, 673
somatostatin-28, 325
spinal cord, 673
substance P, 673
TRH, 325
Bovine intermediate pituitary, 921
molecular oxygen
peptide α-amidation
Bovine joining peptide
guinea pigs, 483
joining peptides, 475, 483
pituitary, 475
porcine, 483
pro-opiomelanocortin, 475
Bovine pancreatic polypeptide, 231
catecholamine
dopamine-β-hydroxylase
superior cervical ganglia
Bradycardia, conditioned, 37
autonomic responses
conditioning, Pavlovian
heart rate
learning
nictitating membrane

rabbits
vasopressin analogs
Brain
accumbens nucleus, 755
adrenal cortex, 89
adrenal medulla, 59, 807, 971
amygdala, 525, 657, 663, 755
amygdala central nucleus, 225
anterior lobe, 431, 557
anterior olfactory nuclei, 755
arcuate nucleus, 521
brain stem, 71, 255, 699
central nervous system, 739, 879
cerebellum, 71, 335, 585
cerebral cortex, 133, 255, 483
cerebral ventricles, 97
claustrum, 755
corpus striatum, 43
cortex, 755, 837
dentate gyrus, 755
dorsomedial nucleus of thalamus, 305, 521
forebrain, 837
fornix, 331
frontal cortex, 71, 915
hippocampus, 239, 261, 283, 331, 335, 735, 879, 915
hypothalamus, 71, 165, 287, 305, 331, 463, 483, 493, 521, 585, 617, 755, 785, 817, 837, 849, 879, 883, 915
lateral nucleus, 663
lateral septum, 837
lateral ventricle, 239
limbic forebrain, 255
medial forebrain bundle, 521
median eminence, 521
medulla oblongata, 335, 669
midbrain, 335, 915
neurointermediate lobe, 431
nigro-striatal system, 955
nucleus accumbens, 43, 609, 749
nucleus ambiguus, 621
nucleus preopticus medialis, 617
nucleus tractus solitarius, 617, 621, 657, 699, 743
olfactory bulb, 71, 755
olfactory tubercle, 755
paraventricular nucleus, 165, 225, 287, 941
periaqueductal gray, 907
pituitary, 107, 225, 305, 431, 475, 483
pituitary-adrenal axis, 211, 217, 221
septum, 195, 199, 331
spinal cord, 673
spinal trigeminal nucleus, 669
striatum, 71, 335, 609, 915
subiculum, 331
substantia nigra, 603, 609, 955
suprachiasmatic nucleus, 225
supraoptic nucleus, 165
telencephalon, 663
thalamus, 335, 755, 837
vagus nerve, 375, 657, 743, 807
ventral tegmental area, 749
ventromedial nucleus, 521
zona compacta, 603
zona incerta, 521
zona reticulata, 603
Brain, human, 879
cyclo (His-Pro)
neuropeptide
neurotransmitter
Brain monoamines, 325
body temperature
bombesin
γ-MSH
somatostatin-28
TRH
Brain mRNA, 651
adrenealectomy
glucocorticoid
opioid peptides
solution hybridization
Brain receptors, 335
^{3}H-AVP
neuropeptide
Brain tissue, 699
kidney, rat
neuropeptides

Caerulein
acetylcholine release, 49
amphibia, 457
CCK, 457
guanidine, 49
guinea pig, 49
myenteric plexus, 49
somatostatin, 49
Calcitonin, 63
central nervous system
intestinal motility
Calcium, 273
chlorotetracycline
β-endorphin
fluorescence
Cancer, 683
bombesin
human studies
neuroendocrine peptides
Capsaicin
cysteamine, 669
guinea pigs, 769
mesenteric ganglia, 769
somatostatin, 669
substance P, 669, 769
sympathetic ganglia, 769
Cardiovascular regulation, 621
hindbrain nuclei
opiate receptors
Cardiovascular responses
alcohol, 563
autonomic nervous system, 617
catecholamines, 617, 971
chemoreceptors, 171
dependence, 563
